# CHILD & FAMILY WELL-BEING

We fund implementation support for public and private child- and family-serving agencies to adopt and sustain evidence-based and evidence-informed programs shown to prevent or treat child maltreatment.

## STRATEGIES

**\$200,000**

### Advocate for Improvement

Many dedicated, knowledgeable professionals work in the child welfare system, but systemic challenges can inhibit their effectiveness. We use our resources and relationships to support advocacy and communications strategies that speed improvement of the prevention, early intervention and foster care systems. We believe that by working closely with government agencies and nonprofit organizations that reflect the communities served, we can enhance the spread of information and facilitate conversations within communities.

**\$7,062,197**

### Commit to Innovation

We recognize the lack of evidence-based or -informed models for the range of issues children and families face and the diverse populations served. If we did not commit to innovation, we would miss opportunities to identify programs that improve outcomes. We support grantees in developing and testing innovative, tailored, data-driven approaches. We encourage models that specifically look at risks and solutions through the lens of race.

**\$12,803,590**

### Support Implementation for Tested Programs

We fund implementation support for projects that adopt and sustain evidence-based or -informed models shown to prevent or treat child abuse and neglect and enhance well-being. "Implementation" refers to activities that are designed to put defined programs into practice. An active implementation framework answers the questions of what needs to be done (effective interventions), how to establish what needs to be done in practice, who will do the work to accomplish positive outcomes and where will effective interventions and implementation thrive. Rather than letting change happen, we work with organizations and agencies to make change happen for children and families of all races and ethnicities.

# CHILD & FAMILY WELL-BEING

GRANTEE	GRANT DESCRIPTION	STRATEGY	GRANT AMOUNT
<b>A Child's Haven</b> Greenville, SC	To provide implementation support for Child-Parent Psychotherapy, an evidence-based, in-home model.	Support Implementation for Tested Programs	\$100,000
<b>Benchmarks</b> Raleigh, NC	To continue supporting Partnering for Excellence, a collaborative to improve service integration and quality treatment in child welfare.	Commit to Innovation	\$725,000

# HEALTH CARE

We believe that maintaining health over time is dependent on a person's ability to lead a healthy lifestyle and access essential health care services. We support reforms that ensure an individual's basic medical and social needs are met, so they can enjoy the best health possible.

## STRATEGIES

### Improve Community Health

We advance programs and policies that promote healthy lifestyles and address social determinants of health. We create opportunities for collaboration to meet community needs and ensure local voices inform improvements. We prioritize data collection and sharing so that partners are better equipped to identify opportunities and target interventions.

**\$11,646,000**

**\$29,391,308**

### Enhance Patient Care

We work with health systems and their community-based partners to identify, test, and spread innovative practices that have the potential for scale and sustainability. We prioritize models that build capacity to provide essential health and social services to vulnerable populations. We know that by providing access to culturally appropriate care—at the right time and place—health improves.

## HEALTH CARE

# 6 FUNDING PRIORITIES

### Access to Care for Vulnerable Populations

Access to essential health care services is critical to good health, yet vulnerable populations in the Carolinas face a variety of barriers. We are interested in supporting access-expanding projects for undeserved populations such as racial minorities and rural residents. Health Care also funds 30 AccessHealth networks (by invitation only) to increase access to essential services for low-income uninsured adults.

### Maternal and Infant Health

Significant health disparities fuel poor maternal and infant health outcomes for women of color and women in rural communities. Health Care will support evidence-based programs and models that prioritize reducing health disparities and improving maternal and infant health outcomes.

### Mental Health

Research has shown that early identification and treatment of mental health conditions can significantly improve overall health and well-being. The Endowment is interested in supporting models of care that increase access to quality mental health services and prevention programs with a specific emphasis on pediatric mental health care.

### Oral Health

Millions of adults and children do not receive essential oral health services each year, leading to poor health outcomes and lower quality of life. To broaden access to care and reduce oral health disparities in children, The Duke Endowment is helping school-based oral health programs (by invitation only) expand, including investments in advocacy and policy reform efforts.

### Population Health

Research suggests environmental factors and personal behaviors carry a far more significant impact on population health outcomes than clinical care. These social determinants of health hold the keys to addressing America's high rates of obesity and chronic disease. Our Healthy People, Healthy Carolinas initiative uses regional community coalitions to help address these upstream drivers of health.

### Workforce Development

Given the many efforts underway to improve population health and reduce disparities in health outcomes, there is a need for a community-based workforce that serves as a liaison between health care, social services, and the community, including individuals with lived experience, such as community health workers.

# HEALTH CARE

GRANTEE	GRANT DESCRIPTION	STRATEGY	GRANT AMOUNT
<b>Alexander County Health Department</b> Taylorsville, NC	To support the expansion of a comprehensive school-based oral health program.	Enhance Patient Care	\$400,000
<b>Atrium Health Foundation</b> Charlotte, NC	To evaluate best practices for expanding the Atrium Health Hospital at Home program.	Enhance Patient Care	\$749,000
	To test a virtual engagement model to expand access to behavioral health services for children and adolescents.	Enhance Patient Care	\$700,000
	To test a model that integrates an evidence-based psychological assessment into clinical visits for medically fragile children.	Enhance Patient Care	\$557,100
	To expand a Healthy People, Healthy Carolinas coalition to increase capacity and improve population health in York County.	Improve Community Health	\$450,000

# HIGHER EDUCATION

We strive to understand and support the selected priorities of four schools and help them learn from each other as they contribute to the higher education sector. The long-term goal is advancing high-value education for students. We support the four institutions named in Mr. Duke's Indenture of Trust: Davidson College, Duke University, Furman University and Johnson C. Smith University.

**\$97,265,000**

## STRATEGIES

### Support Institutional Priorities

We work with the schools to support select institutional priorities for long-term impact. We meet with leaders regularly at each institution to learn about and identify ways to help advance each school's strategic priorities.

# HIGHER EDUCATION

# RURAL CHURCH

We are committed to preserving the pivotal role churches play in rural communities. We support clergy and congregations — ensuring they have the tools to walk faithfully together — as they strengthen rural areas. We help United Methodist Churches make greater contributions that have lasting, positive impacts in their communities.

## STRATEGIES

**\$5,800,000**

### Build Congregational Capacity

In healthy churches, clergy and laity maintain strong awareness of their community and ties to it. We support programs that engage rural congregations with their neighbors to identify and implement solutions that could have a lasting, positive impact on their rural region.

**\$5,244,745**

### Cultivate and Support Pastoral Leaders

We support programs that recruit and retain candidates for ministry; nurture clergy growth and competencies including cultural sensitivity and racial equity; and support training for district superintendents to develop missional strategies that strengthen connections between churches and their communities. We believe that doing so benefits rural communities across the state.

**\$694,000**

### Identify and Test Selected Programs

We identify, develop, test and share programs that have demonstrated positive outcomes, with a special focus on children. Simultaneously, we provide funding for churches to implement these programs.

**\$200,000**

### Other

# RURAL CHURCH

GRANTEE	GRANT DESCRIPTION	STRATEGY	GRANT AMOUNT
<b>American Institutes for Research</b> Chapel Hill, NC	To build evidence for the Rural Church Summer Literacy Initiative program model.	Identify and Test Selected Programs	\$574,000

### COVID-19 Work

As the needs grew and new challenges emerged throughout the pandemic, our grantees and partners across the Carolinas continue to nurture children, strengthen health care, educate minds and enrich spiritual life. The Duke Endowment is privileged to support them and the communities they serve.

**\$7,470,000**

### Zero to Eight Place-based

The Duke Endowment is focusing on early childhood as a way to produce greater impact across our grantmaking and provide for better and more equal opportunity for children and families. We believe this emphasis on prenatal to age eight promises a more effective approach to addressing the issues that confront our communities today.

**\$692,187**
